## EDUCATION

**Towson University** Jan. 2023 – Dec. 2024  
*Bachelor of Science in Computer Science* GPA: 3.65

- Relevant Coursework: Cybersecurity, Cryptography, Artificial Intelligence, Data Communications & Networking, Operating Systems, Software Engineering, Mobile Applications Development

**Pikes Peak Community College** Aug. 2020 – May 2022  
*Associate of Science in Computer Science* GPA: 4.00

- Relevant Coursework: Computer Architecture, MIPS Assembly, Computer Science I & II: C++

## SKILLS

**Languages:** Python, Java, JavaScript, Kotlin, C/C++

**Frameworks & Libraries:** React, Node.js, Express.js, PyTorch, TensorFlow

**Developer Tools & Technologies:** Git, Visual Studio Code, Visual Studio 2022, Linux, MongoDB

## PROJECTS

**Full-Stack Multi-Game Website** | MongoDB, Express.js, React, Node.js

- Collaborated closely with team members to develop a multi-game website using MongoDB, Express.js, React, and Node.js.
- Led the implementation of front-end functionalities, leveraging React to create dynamic and interactive interfaces for games such as tic-tac-toe, checkers, and connect four.
- Designed and developed the login and signup pages, ensuring secure authentication, while integrating them seamlessly with the back end.

**Android Planner Application** | Kotlin, Jetpack Compose

- Developed an Android planner application using Kotlin and Android Studio to help users track tasks and events, viewable via a calendar or task list.
- Designed and implemented a user-friendly and intuitive user interface, ensuring a seamless and responsive experience across screen sizes and devices.
- Implemented a database system using Android's Room Database library to efficiently manage user data, ensuring seamless storage and retrieval of information within the application.

**Nintendo DS Icon Extractor** | C, C++

- Reverse engineered the icon format in Nintendo DS ROM (.nds) files and built a C++ tool to extract and decode embedded 32×32 game icons from raw binary data.
- Implemented binary parsing, bit manipulation, and palette conversion to reconstruct tile-based graphics and export high-resolution PNG images from low-level ROM structures

**Secure Client-Server Messenger** | Python

- Developed a secure, real-time messaging system in Python using a multi-threaded client-server architecture with SSL/TLS encryption for secure communication.
- Implemented both server-side broadcasting and concurrent client handling using threading, enabling simultaneous message exchange between multiple clients.
- Gained hands-on experience with socket programming, secure network communication, and SSL certificate integration to ensure encrypted data transmission.

## PREVIOUS WORK EXPERIENCE

---

**Independent Car Service Inc.** | Office Assistant Manager, Finksburg, MD **2025 – Present**

- Manage booking system and coordinate transportation schedules.
- Handle customer inquiries and booking requests via phone and email.
- Assist in creating and maintaining operational reports.

**Food Lion** | Stocker, Mount Airy, MD **2022 – 2023**

- Responsible for receiving, verifying inventory, and stocking shelves throughout the store.
- Ensured item presentation was well organized and faced in a professional manner.
- Provided prompt customer service as necessary.

**Walmart** | Cashier, Colorado Springs, CO **2019 – 2020**

- Provided exceptional customer services by efficiently processing cash, credit, and debit transactions.
- Maintained store cleanliness, stocked shelves, and ensured the front-end area was organized and ready for customers.
